### Introduction

---

EMINENT SYSTEM is incorporated in 2005. Its main objective is Deliver High Quality Application and always exceeds the criteria of customer satisfaction. EMINENT SYSTEM is owned and managed by a team of business professionals and technocrats, who have global experiences of harnessing people and technology in the business process. The technical depth of EMINENT's management team is unique in Information Technology, thereby ensuring outstanding performance, reliable service, faster and more cost-effectively creative solutions for your business needs.

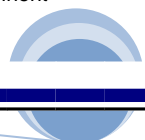

Eminent System's solutions are engineered by its Research & Development team which ensures that the solution provided is functionally, technically and economically sound besides being compliant to National and International Standards. We are recognized for offering unique and innovative solutions based on cutting-edge with latest technologies.

ES core focus is on software services, discovery and development of software products to improve information technology. Using technology services Eminent System helps clients to overcome business challenges, from selecting the right software application to developing the perfect architecture that will grow with the business. ES's solutions and consultants, including experienced business analysts and knowledgeable technical architects, partner Technology Decision Makers all the way and give a clear direction to our clients' technology-dependent initiatives.

Over period of two years, EMINENT SYSTEM has also ventured in the field of small ERP. We had the privilege of designing and conducting programs for corporate world as per their specific needs. In the recent past we have made various ERP related software for our clients. Eminent System is the company leading the way based on their aspiring slogan "Vision of your Future" to help the peoples to move forward and to prove themselves in the ever changing era of global business environment.

The 3-year history of Eminent System is one of creative, technically excellent, tenacious people – people helping businesses and governments apply information technology to achieve new levels of competitiveness and success.
